Expand GrandFabric System

A portable and modular display solution – developed to cover all your tradeshow and event needs.

expand®

expandmedia.com

Create a unique display solution for every tradeshow and event

This modular and portable system is extremely flexible thanks to its lightweight aluminum structure that is covered with high quality fabric. The dye-sub print renders your image perfectly and exposes your message in two directions. The wall modules are available in different sizes, both straight and curved.

With the stabilizing feet and module connectors you will be able to create unique display solutions in different sizes and shapes every time you use it. Connect several wall modules and create a display - add storage and accessories like spotlights, shelves and multimedia - and transport everything in your car.

Combine the wall modules of your choice

With three wall modules you get up to six surfaces to communicate your brand and message.
Create a backwall, a snake, an open island, an "L", a "U" or a "T" shaped configuration.

High quality print gives your image an excellent finish

Your image is printed with a dye-sub technique on stretch fabric (polyester), giving your image a high quality result. Choose print on both sides for double exposure. The fabric is wrinkle-free and can be cleaned with a cloth or machine washed.
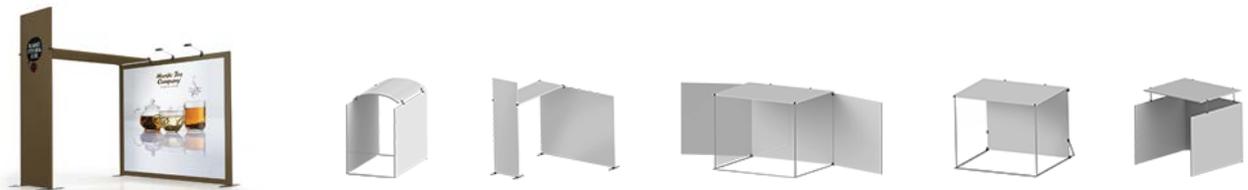

Add storage space - and get endless possibilities

With 1 meter (or 3.28 feet) of storage space, you get even more options to create different stands and display solutions. The modules that are used for building the storage can be connected to all the Expand GrandFabric wall modules - or be used separately as stand-alone backwalls. This gives you even more configurations to use for future events.

Create a room with a roof

The modules can also be set up horizontally and be used as roof modules.
The different connectors and feet allow you to create spaces and rooms, i.e. if you want to have a lounge area or a meeting room for your customers and prospects in your booth space.

Raise your brand with a hanging display

If you want to make sure to be seen - communicate your message above the crowd.
The versatile Expand GrandFabric modules can also be used as hanging ceiling displays. Available in triangular, circular and rectangular shapes.

Add some crowd control

Use a short return wall in your booth to create separation without putting up a whole wall! Or use a series of barriers to create crowd-control around a display, like at a car show. You can also create a bull-pen for a consultation/seating area, or even a way-finding maze to advertise your brand while the crowd stands in line at your event.

Accessories

Accessories available for the Expand GrandFabric System:
- Monitor holder: max weight 15 lbs. up to 32"
- Brochure holder: max load 4.5 lbs.
- Small shelf: max load 6.5 lbs.
- Table: max load 33 lbs.
- Full length shelf: max load 17.6 lbs. (*only available for 57 3/4" straight module*)
- Spotlights

Accessories can be used on both straight and curved wall modules and are available for the left and right hand-sides.

Set up and transport

How to set up

1. Click the 4 frame parts together
2. Pull over the pillow case fabric graphic over the frame
3. Close the zipper
4. Attach the two feet
5. Ready!

How to transport

Pack your Expand GrandFabric System in our Expand PodiumCase, our combined counter and shipping case on wheels. Two smaller or one large wall module fits into one case.
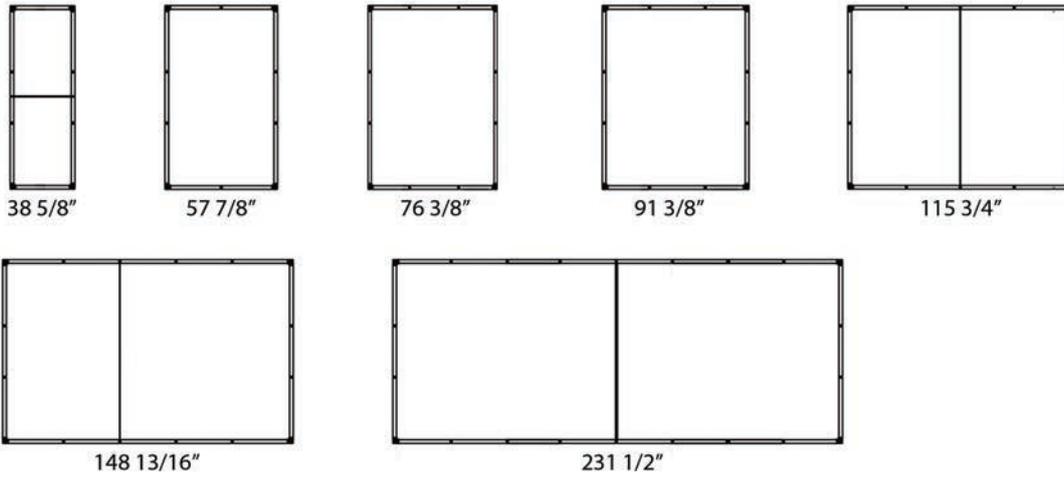

Create your Expand GrandFabric booth

Combine your wall modules based on your needs.
