

Expand Design Tool

Installation Guide

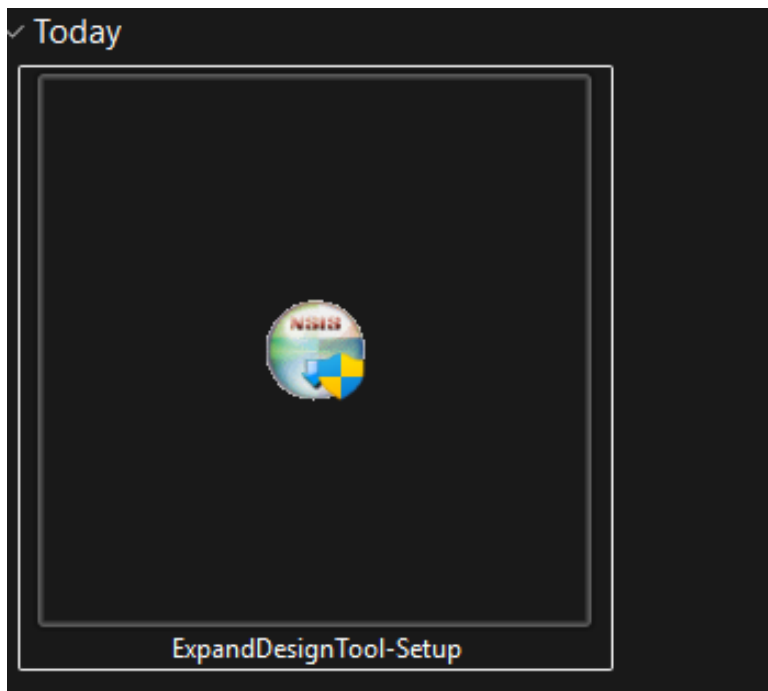

Step-by-step instructions for downloading and installing the tool

Overview

This guide walks you through downloading and installing the Expand Design Tool on your Windows computer. The process takes only a few minutes. Follow each step carefully, especially the Windows security prompt — this is expected behavior for new software.

Step 1: Download the Executable File

Go to expandmedia.com/ExpandDesignTool and download the ExpandDesignTool-Setup.exe file. Once downloaded, it will appear in your browser's download bar or in your Downloads folder.

Step 2: Open the Downloaded File

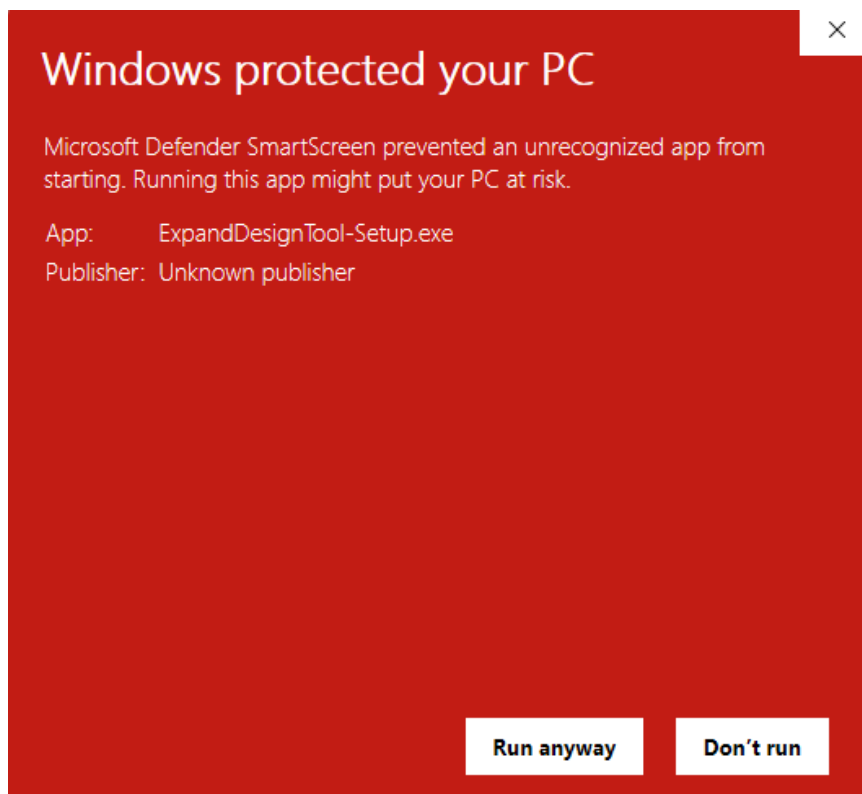

Navigate to your Downloads folder and double-click the ExpandDesignTool-Setup.exe file to begin the installation. Windows Defender SmartScreen may display a security warning.

 **Note:** This warning is expected. The app is safe — Windows shows this for newly released software that has not yet built a reputation score with Microsoft.

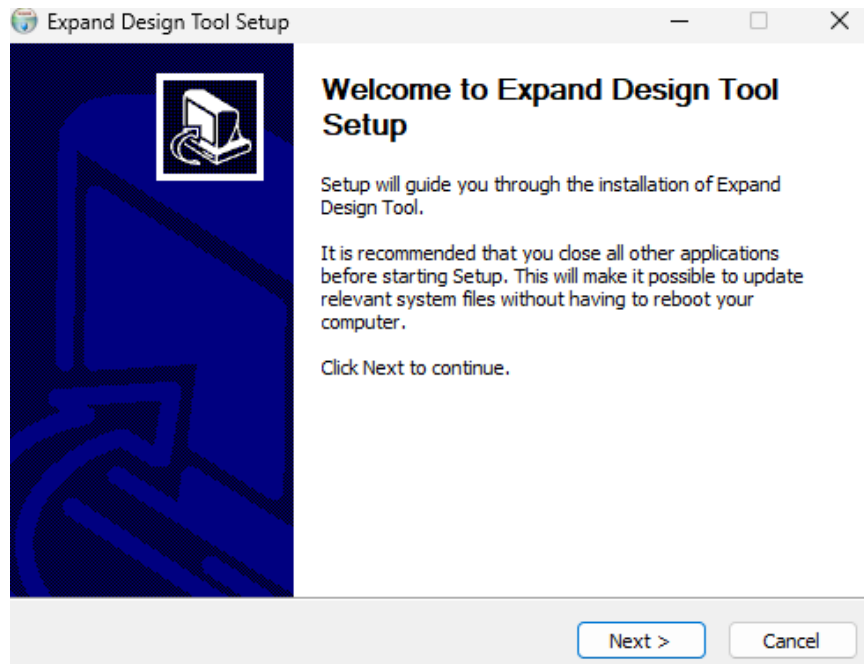

Step 3: Bypass the Windows Security Warning

On the warning screen, click "More info" to reveal the option to proceed. You will then see the app name (ExpandDesignTool-Setup.exe) listed. Click "Run anyway" to continue with the installation.

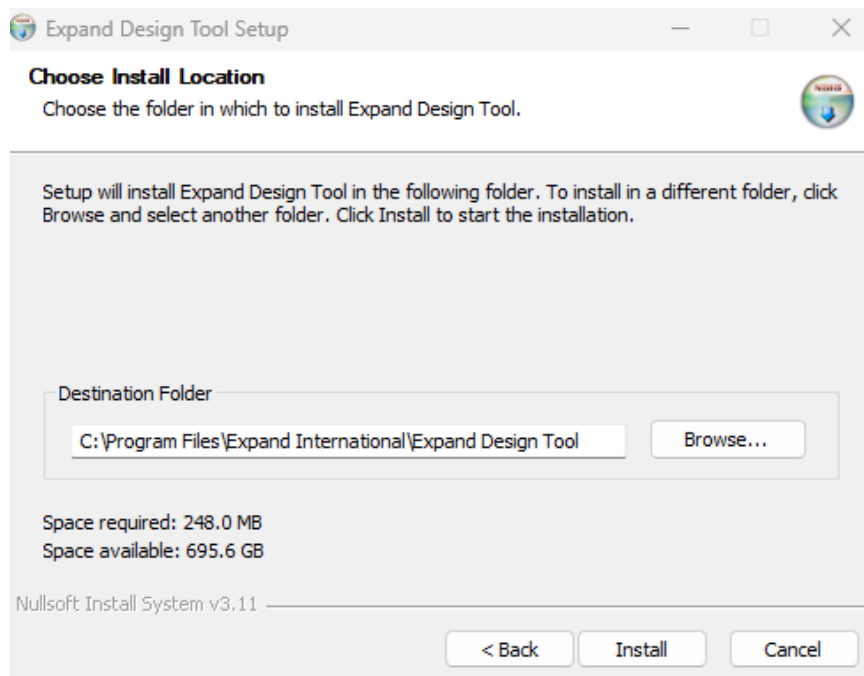

Step 4: Welcome Screen — Click Next

The Expand Design Tool Setup wizard will open. Read the welcome message and click "Next >" to proceed.

Step 5: Choose Install Location — Click Install

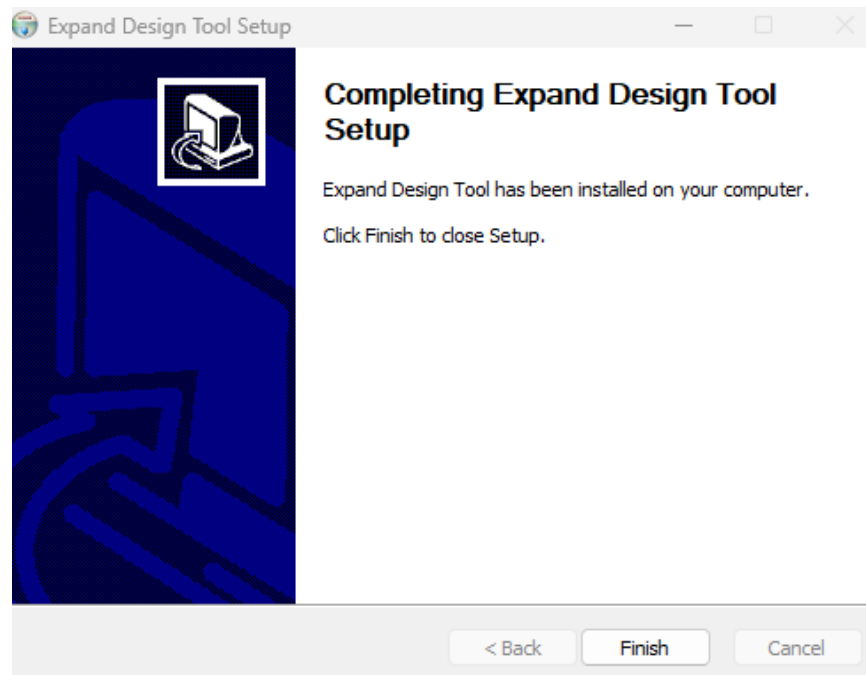

The installer will automatically suggest a destination folder: C:\Program Files\Expand International\Expand Design Tool. This is the recommended location. You do not need to change it. Click "Install" to begin the installation.

 **Note:** The installation requires approximately 248 MB of free disk space.

Step 6: Installation Complete — Click Finish

Once the installation finishes, you will see the "Completing Expand Design Tool Setup" screen confirming that the tool has been successfully installed. Click "Finish" to close the setup wizard.

Step 7: Find the Desktop Icon

After installation, an "Expand Design Tool" shortcut icon will appear on your desktop. You can use this to launch the application at any time.

Step 8: Launch the Application & Log In

Double-click the desktop icon to open the Expand Design Tool. On first launch, the application will load and display a login screen. Enter your e-mail address and password to sign in. You may enable "Remember password" for future convenience.
