

Expand Lightbox

A portable light box to make your message shine

With the portable Expand LightBox, your message and brand stand out a bit extra at any exhibition or event – both large and small. It is easy to set up, take down, pack in the nylon bag and transport in your car.

This light box can be used as a free-standing backlit wall, or integrated with the popular Expand GrandFabric system. If it is used as part of a stand, you create a configuration to fit your needs and the entire stand can be varied in both shape and size depending on the floor space.

Communicate with light - both front and back

If you choose print on both back and front, your message shines in two directions – perfect in environments where viewers come from different directions. If you only want print on one side, the back comes with a light reflecting fabric.

Available in two different types of fabric

Choose between a stretch fabric that you pull over the frame (like a pillow case) or a two-piece fabric - where you insert the silicone edge (called SEG - Silicone Edge Graphic) into the gap in the frame.

Great light distribution with LED

This light box is illuminated with LED light, placed in the top and bottom, to provide an even glow over the graphics. It has a low electric consumption - which is good for the environment. It is also made for different types of electrical standard - EU and US.

Sizes and weight

The light box is available in different sizes and can be ordered both single and double-sided.

Light boxes 80cm high

80x80 cm = 0,5 kg
80x160 cm = 13 kg
80x240 cm = 17 kg

Light boxes 160cm high

160x80 cm = 14 kg
160x160 cm = 17,5 kg
160x240 cm = 20,5 kg

Light boxes 240cm high

240x80 cm = 18 kg
240x160 cm = 21 kg
240x240 cm = 24,5 kg

Easy to transport and to set up!
