

Expand Lightbox

A portable light box to make your message shine

With the portable Expand LightBox, your message and brand stand out a bit extra at any exhibition or event – both large and small. It is easy to set up, take down, pack in the nylon bag and transport in your car.

This light box can be used as a free-standing backlit wall, or integrated with the popular Expand GrandFabric system. If it is used as part of a stand, you create a configuration to fit your needs and the entire stand can be varied in both shape and size depending on the floor space.

Communicate with light - both front and back

If you choose print on both back and front, your message shines in two directions – perfect in environments where viewers come from different directions. If you only want print on one side, the back comes with a light reflecting fabric.
